portofolio

Bekasi, Indonesia

Passionate Informatics Engineering student at Bakrie University who loves turning ideas into polished digital experiences. From crafting pixel-perfect UIs and intuitive mobile apps to building scalable backends, I work across the full stack — Golang, Kotlin, TypeScript, Flutter, Firestore, SQL, MongoDB, and Neo4j. I thrive in collaborative environments, pick up new technologies quickly, and genuinely care about the impact of the products I build.

Project Experiences

esPoint - Remote

May 2025 - Jul 2025

Lead Developer & UI/UX Designer

- Built a complete mobile application independently using Flutter and Firebase Firestore.
- Designed modern and responsive UI with clean UX principles.
- Implemented core features including product & stock management, transaction recording, and sales analytics.
- Integrated Firebase Authentication, real-time Firestore database, and local notifications.
- Used Provider for state management and fl_chart for visualizing sales reports.
- Structured app with clean code architecture: models, services, providers, and screens.
- <https://github.com/aryaputraderiz/espoint>

Tidy

Jun 2025 - Jul 2025

Mobile App Developer

A Flutter-based student planner & reminder app with Google Sign-In, Firebase Firestore sync, and local notifications for task & schedule management.

- Task & Reminder Management with interactive calendar
- Google Sign-In Authentication & real-time sync using Firebase Firestore
- Local Notifications for task reminders
- Clean & responsive UI with Google Fonts & Lottie animations
- <https://github.com/aryaputraderiz/tidyplanner/tree/main>

Flood Detection - Remote

Mar 2026 - Apr 2026

- Built a real-time flood water level detection system using U-Net CNN, PyTorch, and OpenCV with binary segmentation to classify water vs non-water areas from live camera feed.
- Implemented adaptive sound alarm with 4 alert levels (safe, caution, danger, emergency), adjustable ROI zone, and real-time status overlay with FPS counter.

Brewy

Apr 2025 - Jul 2025

Developer

Built a cross-platform cold beverage POS app using Flutter with features including inventory management, multiple payment methods (QRIS, card, and cash), sales analytics, and PDF receipt printing.

- Built a complete cross-platform POS mobile application independently using Flutter and Dart.
- Designed modern and responsive UI tailored for cold beverage business workflows.
- Implemented core features including product management, inventory & recipe (HPP) tracking, transaction recording, and sales analytics dashboard.
- Integrated QRIS payment, local SQLite database, and PDF receipt printing.
- Used Provider for state management and fl_chart for visualizing sales reports and KPI trends.
- Structured app with clean code architecture: models, providers, widgets, and screens.
- <https://github.com/aryaputraderiz/Brewy>

Education

Universitas Bakrie - Jakarta, Indonesia

- Nov 2026 (Expected)

Undergraduate Informatics Engineering, 3.20/4.00

- Studying core computer science fundamentals including Data Structures, Algorithms, and Software Engineering, alongside applied courses in Mobile Development, Database Systems, Computer Networks, and UI/UX Design. Actively involved in hands-on projects covering web, mobile, and machine learning development.

SMK Negeri 5 Bekasi - West Java, Indonesia

Jul 2019 - May 2022

Vocational High School

- Gained foundational skills in software development, including programming (Java, PHP), database design (MySQL), and web

- development (HTML, CSS, JavaScript).
- Completed practical projects in desktop and web application development.
- Learned software lifecycle, UI/UX basics, and version control using Git.
- Participated in internship programs (Praktek Kerja Lapangan) to apply knowledge in real-world IT environments.
- Eligible for SNMPTN
- Top 20 in class cohort

Organizational Experience

HMTIF (Himpunan Mahasiswa Teknik Informatika) - Jakarta,Indonesia

Oct 2023 - Jul 2024

Public Relations Staff

- Represented the organization in external communications and coordinated with partners for events and collaborations.
- Managed promotional content and maintained engagement across social media platforms.
- Assisted in organizing campus activities and building relationships with stakeholders and student communities.

Youth Mosque Organization - Bekasi,Indonesia

Jan 2021 - Aug 2021

Vice Chairperson

- Assisted the chairperson in leading the organization and overseeing all youth activities.
- Coordinated religious, educational, and social programs for the local community.
- Managed internal meetings, delegated responsibilities, and supported team collaboration.
- Strengthened leadership, public speaking, and event planning skills through active involvement.

Compiler - Jakarta,Indonesia

May 2023 - Jun 2023

Sponsorship

- Reached out to potential sponsors and negotiated collaboration proposals to support event funding.
- Drafted sponsorship decks and handled communication with external partners and vendors.

Skills, Achievements & Other Experience

- **Programming Languages:** Dart (Flutter), Python, TypeScript, Kotlin, Golang
- **Frameworks & Tools:** Flutter, PyTorch, OpenCV, Firebase Firestore, Git, GitHub, VS Code, Android Studio, Postman (API testing), Docker
- **Database:** Firebase Firestore, MongoDB, Neo4j, SQLite, Supabase
- **Data Modeling:** XML, JSON, ERD, UML, NoSQL Schema Design, GraphDB (Neo4j)
- **UI/UX Tools:** Visily, Figma
- **Other Tools:** Microsoft Office
- **Soft Skills:** Fast Learner, Team Collaboration, Problem Solving, Time Management, Project Management, Critical Thinking
- **Interest:** Front-End Developer, UI/UX Designer, Mobile Development, IT Project Management, Machine Learning & Computer Vision, Data Analyst
- **GitHub** : <https://github.com/aryaptraderiz>
- **Language:** Bahasa Indonesia (Native), English (Intermediate)
